PRODUCT INFORMATION T24 LE Offshore Harness

T24LE OFFSHORE

The WillansT24LE harness is manufactured under the ISO 9001:2015 quality system.

It fulfils the requirements of three separate European standards:

- BS EN 813 2008 (Sit Harness)
- BS EN 358 2018 (Work Positioning Systems)
- BS EN 361 2002 (Full Body Harness)

The T24 LE is equipped with waist level suspension for working aloft, as well as a lanyard with “D” for use in rescue. This lanyard stows neatly along the shoulder strap when not in use. The dorsal “D” located between the shoulder blades is used for fall arrest purposes.

Four smaller metal “D” rings are provided at waist level for carriage of tools.

Double action snap hooks are used to connect leg and waist straps.

The wide waist and back straps of this harness are lined with expanded neoprene padding for additional comfort.

Available in Medium, Large and Extra large sizes

Fibre identity polyester
